

# A Deeper Evolver : 50 programs for Evolver

**A Deeper Evolver** is a bank of 50 House / Deep House-oriented sounds specially designed for the Evolver. It includes the great classics of the genre (synth, bass, keyb, ...) and two sounds of kickdrum.

**Note:** only the modulation wheel has been used, in order to leave the user to freely determine the relevant parameters that can be assigned.

## How to load **A Darker Evolver** sounds bank in your Evolver

First of all, it is advisable to save the programs of your Evolver by referring to the specific chapter of the manual (page 17 for the Evolver Desktop: *MIDI Dump*).

The **A Deeper Evolver** folder consists of two different format files: Standard Midi File (SMF) and ebp, which is format of the SoundTower Evolver SoundEditor Editor.

It is important to note that programs will load into bank **4** of your Evolver.

1) To load the *standard midi file* into your Evolver, start your sequencer (Cubase, Logic, Ableton, ect ...) and create a MIDI track. Make sure that the MIDI output port of the interface is connected to the MIDI input port of the Evolver and that the channel numbers are the same. Once playback has started, you can follow the numbers of the programs that are being loaded; when the number 128 is reached, your bank A Darker Evolver is loaded and ready to use.

2) To load the *ebp* file into your Evolver, start the Evolver SoundEditor software and make sure that the MIDI interface selected in the MIDI → MIDI Setup menu is the same that the one which is connected to the Evolver. Then, in the "Program" menu choose "Load Program Bank To" and locate the file *A Darker Evolver.ebp* in the folder A Darker Evolver on your computer. Once the **D** bank is loaded, the names of the programs are displayed in the corresponding column, you simply have to send it to the Evolver by selecting in the "Program" menu the command "Transmit Bank → Program Bank D". Once this is done your bank **A Deeper Evolver** is loaded and ready to use.

**Note:** **A Deeper Evolver** sounds bank is compatible with **all** Evolver models including Poly Evolver Rack and Poly Evolver Keyboard.

For any problem / request, thank you to send an Email to : [emperairepierre@hotmail.com](mailto:emperairepierre@hotmail.com) a delay of about one day is necessary to get an answer.
