276 Bessel Bass	

Controllers

While the **Aftertouch** is assigned to the pitch modulation, the **Mod Wheel** and **Controller Slider** are assigned to different types of parameters for each program. (Envelope times, Filters cutoff, Lfo speed, Shaper amount, Distortion amount, etc...)

Feel free to test them to max the fun !!! :-)

For the K2000R users, Controller Slider is responding to the Data entry **Msb Midi Control Change 6**.
