Once downloaded, the file must be unzipped. You will find two sound folders. One with the sample attached to the programs, one with just the programs. To load the set in your Nord Stage 3, connect it on your computer with the USB. Open the Nord Sound Manager and import the sounds in the nord sound Manager. You use bundle download to import the program with the sample. You use the download function just for import the program without the sample associated. Then Download the sounds in the Nord stage 3...and have fun !
